DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Thursday, 03 November 2022 at 04:37 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Unsettled conditions will continue today, which means that air pollution levels are expected to be Low across the UK.

Tomorrow: Mainly Low levels of air pollution are expected, although lighter winds on Friday night mean that pollution levels near bonfire night celebrations may be higher than shown on the forecast maps.

Outlook: Air pollution levels will be mostly Low. Breezier conditions will help to keep levels down near bonfire night celebrations, although locally higher pollution levels are still possible in the immediate vicinity.
